

UNITED STATES PATENT AND TRADEMARK OFFICE  
**CERTIFICATE OF CORRECTION**

PATENT NO. : 7,013,354 B1  
APPLICATION NO. : 09/166488  
DATED : March 14, 2006  
INVENTOR(S) : Gregory F. Beck et al.

Page 1 of 1

It is certified that error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Title Page, item [57]  
IN THE ABSTRACT

The Abstract should read as follows:

--A system for transmitting and receiving data formatted in IEEE 1394 standard between devices using a same IEEE 1394 broadcast channel includes a bus, to which is connected a controller, and first and second 1394 interfaces. First and second devices, which are connected (respectively) to the first and second interfaces, use the broadcast channel. The CPU is configured for 1) receiving data from either the first or second device, attaching an ID header, which includes identification information on a recipient device based at least in part on a transmitting device, and retransmitting the received data with the ID header onto the bus, and 2) receiving data with the ID header, interpreting the header to identify which of the first or second interfaces should receive the data, and transmitting the data to the identified interface. The ID header contains information about the data and is used to build the 1394 header.--

Column 3

Line 6, "The ID header , which is other than a 1394 interface." should be deleted.

Column 16

Line 2, "device" should read --transmitting device, and--; and  
Line 3, "which transmitted the data" should be deleted.

Signed and Sealed this
